

Three Day Programme on 'Lean Six Sigma: Green Belt Certification Course'

Introduction

Methodologies of Lean Six Sigma focus on reducing defects and eliminating waste in an organisation's processes, which is the secret of success for many leading companies and other prosperous organisations in the world.

Implementing lean six sigma leads to improved quality along with more efficient ways of producing that quality, which results in higher profits for the organisation. Both manufacturing and service organisations stand to benefit from these methodologies.

The lean six sigma tools can be applied for various processes in the organisation such as design, marketing, sales, production / operations, purchase, stores, customer- service, finance, legal-compliance and risk management.
